

Racing Beast

The new Predator by **Rebellion** takes its technical and design inspiration from racing cars, such as the brake disks and pedals. The honeycombed dial features chronograph counters connected to the dial by rod shaped bridges decorated with a central ruby. The sectorial seconds at 9 o'clock are indicated by a double hand: the shorter hand marking 0-30 seconds, the larger 30-60 seconds. Developed with the assistance of Eric Giroud (of Opus 9 fame), this timepiece is available in red gold, red gold with ceramic, steel, steel with ceramic and red gold with steel. Price for steel and ceramic model: \$18,400.

Marquee Highlights

Tiren's Gotham is now embellished with 0.9 carats of shimmering diamonds on the bezel. Surrounding the square bezel are six lugs intended for stable functionality and added dimension. The 40-mm case reveals a skeleton dial framework with red printing and rhodium numbers. This Gotham Diamond edition is powered by a modified ETA 2897 movement. Price: \$14,050.
